

SERVICES

Asbestos Abatement

Mavo Systems, Inc. has provided expert teams of asbestos abatement crews for all types of industrial and commercial applications.

What makes Mavo Systems a leader in the industry is quality workmanship, well-trained technicians, unmatched customer service and cost effective solutions.

Our experienced staff provides abatement service in a competitive, responsive and viable manner. For over 25 years, Mavo Systems has been cleaning all types of sites, from power plants and refineries to shopping malls, hospitals and schools.

No project is beyond our capabilities or our commitment to providing a fully trained and professional crew.

All Mavo Systems' abatement technicians receive thorough training that covers federal, state and local regulations, medical surveillance and all the basics for doing a safe and quality job. In addition, all environmental management staff at Mavo Systems receive formal training in an EPA-approved asbestos abatement contractor and supervisor training course. To top it off, safety meetings are a daily routine on every project.

Mavo Systems' approach to the asbestos/lead abatement process provides you with a complete solution. In addition, Mavo Systems also offers re-insulation services as a one source contractor.

Our Quality Services Include:

- Complete project estimate
- Preparation of the work area
- Careful and complete removal of asbestos or lead containing material
- Safe disposal
- Work site clean-up
- All required final documentation
