

## SERVICES Mechanical Insulation

Founded in 1982, Mavo Systems, Inc. currently operates offices in White Bear Lake, MN, Wausau, WI, Duluth, MN and Rochester, MN. From small-scale operations to large-scale multi phase projects, each client receives individual attention at your industrial, commercial, retail and institutional sites from each of our experienced staff.

Mavo Systems can provide money saving ideas with proven industrial application methods, reducing costs and yet maintaining lasting insulation systems.

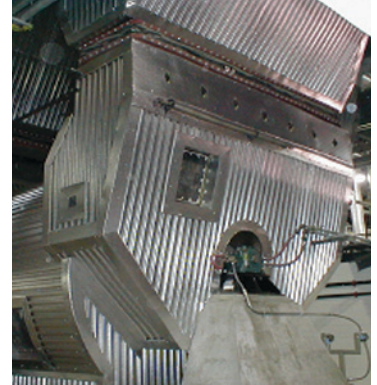

Our asbestos, lead and other hazardous abatement and demolition services provide an economical and efficient means for the customer to utilize one contractor to perform coordinated tasks.

Quality insulation projects require a combination of technology, knowledge, and vast experience. In addition to our insulation services, we can offer a cost-effective turnkey project that utilizes our asbestos removal division, reducing costs that a one-source contractor can provide.

The Mavo Systems management team provides extensive experience within the ranks of 20 to 25 years of individual profiles in the industrial insulation industry. At Mavo Systems, our estimating, project management, and field personnel provide the utmost knowledge in technology and installation methods. This allows us to deliver a functional, cost-effective product with results that help establish long-term relationships with our customers.
